Message

It gives me immense pleasure to learn that ICAR-Agricultural Technology Application Research Institute, Kolkata has come up with a compilation of various multi-faceted agricultural activities undertaken during Krishi Kalyan Abhiyan (1st June 2018 to 15th April 2019). This document entitled "Krishi Kalyan Abhiyan - Towards Agricultural Development in Aspirational Districts" embodies the relentless efforts of KVKs of the Zone at grass root level in collaboration with various state and central government agencies. In spite of inherent remoteness and difficulties, the KVKs of the Aspirational Districts have played a pivotal role towards the fulfilment of national goal of doubling farmers' income. Capacity development, technology demonstration and coordination had been the main KVK activities during the Abhiyan that helped in motivating, teaching and making farmers aware of the improved agricultural technologies.

Bringing out such a useful publication, which is a testimony of the painstaking efforts by the KVKs, is really commendable. I heartily appreciate the Director, ICAR-ATARI Kolkata and the team of scientists for this documentation and congratulate the KVK team for their constant endeavour to make the Abhiyan a success.

(A.K. Singh)

Date: 6th February, 2020

Preface

The Department of Agriculture, Cooperation & Farmers' Welfare under Ministry of Agriculture & Farmers Welfare, Government of India launched the Krishi Kalyan Abhiyan, Phase-I (KKA-I) programme w.e.f. 01.06.2018 to 31.07.2018 which was extended up-to 15.08.2018 to aid, assist and advice farmers on how to improve their farming techniques and raise their incomes. The programme was implemented in 25 villages of each 112 Aspirational Districts identified across the country. As a part of Abhiyan, the trainings were imparted by domain expert from Krishi Vigyan Kendra (KVK) so as to guide farmers towards doubling of income. An action plan was framed in consultation with all line departments

of those districts. During the period of 2018-19, under ATARI Kolkata, ten districts of Odisha state (Bolangir, Dhenkanal, Gajapati, Kalahandi, Kandhamal, Koraput, Malkangiri, Nabarangpur, Nuapada and Rayagada) were covered as Aspirational Districts for carrying out different activities under KKA-I. Those 10 KVKs were provided with the fund of Rs. 2.10 crore to establish/ construct 20 NADEP pits in each village for 15 villages @ Rs. 7000/per NADEP pit. However, after getting success of KKA-I programme in all Aspirational Districts, Government of India again decided to start another phase of KKA programme (KKA-II) w.e.f. 02.10.2018 to 25.12.2018. To carry out various activities, the KVKs were directed to select new 25 villages from the existing Aspirational Districts of Odisha state. During the period under report, as a part of Krishi Kalyan Abhiyan activities, Aspirational District KVKs under ATARI Kolkata trained total 28612 farmers consisting of 14605 males and 14007 females through conducting 290 capacity building programmes during first phase and 18652 farmers consisting of 11217 males and 7435 females through organizing 272 such programmes during second phase. About 9102 q and 8882 q different minikit seeds, 1.1703 lakh and 0.67832 lakh various planting materials were distributed among 77428 and 38047 farmers during KKA-I and KKA-II, respectively. In the respective Abhiyan, 1.29844 lakh and 0.59543 lakh animals comprised of bovines, ovines and caprines were vaccinated which directly benefitted 47836 and 26112 farmers. In addition to NADEP pit establishment and agricultural farm implements distribution, farmers were also benefitted from getting their soil samples analyzed and receiving soil health cards during KKA-I (20571 farmers) and KKA-II (11403 farmers) programme.

As a part of 'Rastriya Gokul Mission', launched by the Department of Animal Husbandry, Dairying and Fisheries (DAHDF), Government of India, during December, 2014, artificial insemination (AI) programme for indigenous bovines started to developand conserve indigenous breeds through selective breeding. But, the progress of artificial insemination (AI) coverage of indigenous bovines was very slow. To take the advantage from success of KKA-I and II, DAHDF in collaboration with Indian Council of Agricultural Research (ICAR) decided to extend the implementation of genetic upgradation programme through High Yielding Indigenous Breed (HY-IB) bovine semen and delivery of quality AI services in 8971 Indian villages among 112 aspirational districts from 15.01.2019 to 15.04.2019. This was considered as Krishi Kalyan Abhiyan, Phase-III programme. A total of 75 villages from each district from Odisha state were identified for carrying out the AI programme. Minimum 100 animals per village was targeted for AI. To make this mission success, it was also decided that at district level, District Animal Husbandry Officer (DAHO) would send daily AI report to the Senior Scientist and Head of KVKs to upload in KVK Portal so that monitoring could be done on daily basis. During the period, a total of 8191 animals were inseminated which benefitted 7734 farmers consisting of 6827 males and 907 females in the state.

This document entitled 'Krishi Kalyan Abhiyan: Towards agricultural development in Aspirational Districts' can provide the detail information about various activities undertaken during Krishi Kalyan Abhiyan programmes conducted at 10KVKs of Odisha under ICAR-ATARI Kolkatain collaboration with other State as well as Central Government Departments. As Director of this institute, I thankfully acknowledge the guidance received from Agricultural Extension Division, Indian Council of Agricultural Research, New Delhi, assistance received from Dean, Extension Education, OUAT, Bhubaneswar, all the concerned KVK personnel of Odisha and scientists and staff of ICAR-ATARI Kolkata for bringing out this publication.

(S. S. Singh)

Districts covered under Krishi Kalyan Abhiyan in Odisha

Contents

Sl. No.	Particulars	Page no.
1	Chapter 1: Krishi Kalyan Abhiyan- I	1-60
2	Chapter 2: Krishi Kalyan Abhiyan- II	61-97
3	Chapter 3: Krishi Kalyan Abhiyan- III	98-123
4	Chapter 4: Learning experience	124-126

Chapter 1: Krishi Kalyan Abhiyan-I

The main aim of 'Transformation of Aspirational Districts' programme was quick and effective transformation of those districts through convergence of central & state schemes, collaboration of central, state level 'Prabhari' officers and district collectors, and competition among the districts driven by a mass movement. The Government was committed to raise the living standards of its citizens and ensuring inclusive growth for all. The health & nutrition, education, agriculture & water resources, financial inclusion & skill development, and basic infrastructure were the core areas of the programme. Krishi Kalyan Abhiyan was an initiative launched by the Ministry of Agriculture and Farmers' Welfare to double the income of Indian farmers by the year 2022 through providing them with assistance and advice on improving their farming techniques. The action plan of the Krishi Kalyan Abhiyan (KKA) was comprised of various activities which promoted best practices and added to the agricultural income of the farmers so that it could stimulate the growth of agriculture sectors in our country. The details about Krishi Kalyan Abhiyan Phase-I programme have been briefed as under.

Duration:

- → Implementation period was from1st June, 2018 to 15th August, 2018
- → Twenty five villages with more than 1000 population each in Aspirational District were covered.
- → In districts where number of villages (with more than 1000 population) was less than 25, all such villages were covered.

Strategy of implementation:

- Distribution of soil health cards to all farmers.
- Total (100%) coverage of bovine vaccination for Foot and Mouth Disease (FMD) in each village.
- Total (100%) coverage of Sheep and Goats for eradication of *Peste des Petits* ruminants (PPR).

Action Plan:

- Distribution of free minikits of pulses and oilseeds to farmers.
- ❖ Distribution of horticulture/agro forestry/bamboo plant @ 5 per family (location appropriate) to 100 families per village.
- **❖** Making 20 NADEP pits in each village.
- ❖ Distribution of 10 to 20 agricultural implements per village.
- ❖ Artificial insemination up-to 100 per village.

- Training programmes in each of the villages by ICAR/KVKs in the following areas:
 - -Bee Keeping
 - Mushroom cultivation
 - -Kitchen garden (preferably of women)
 - -Other relevant income generating activity
- In addition, demonstration programmes on micro irrigation & integrated cropping practices

Implementing agency:

District Level

- ▲ It was implemented by KVKs under the guidance and support of district administration/ATMA, district officials related to Agriculture, Animal Husbandry, Fisheries, Horticulture etc.
- ▲ Krishi Vigyan Kendra (KVKs) were acted as nodal implementer.
- ▲ Officers deputed as In-Charge of the districts for supervision of the Abhiyan.

Ministry level

▲ Districts were allocated to Joint Secretary Level Officers of MoAC&FW for close monitoring of the programme.

Central Prabhari Officers

▲ Central Prabhari Officers and other officers deputed in Gram Swaraj Abhiyan (GSA)-II were requested to oversee the implementation of Krishi Kalyan Abhiyan (KKA).

The details of district profile, selected villages, officers involved and achievements pertaining to trainings, distribution of mini-kit seeds/ planting materials/ inputs, livestock activities including vaccination/ artificial insemination, distribution of soil health cards/ farm implements, establishment of NADEP pits etc. have been discussed under different districts.

Department of Agriculture	Sh. R. Khatua, DAO, Bolangir; Sh. S.Nanda, AAO, Bolangir Sh. P.K Badpanda, AAO, Chudapali; Sh. S.K. Dash, BTM, Bolangir and many others					

Activities and achievements:

The activites and salient achievements under Krishi Kalyan Abhiyan Phase-I have been presented as under-

A) Training programmes:

The KVK Bolangir organized 26 training programmes on vermicomposting, mushroom production, kitchen gardening etc. where a total of 1250 farmers comprising of 1071 males and 179 females were enriched with knowledge and skills. Twenty four officials from other departments were present in that training programme.

Name of programme		No. of farmers benefitted									No. of other	
	KVK person	programmes	SC		ST		Others		Total			(except KVK) officials
attended		М	F	M	F	М	F	M	F	T	attended the programme	
Training on vermicomposting, mushroom production, kitchen gardening and other need based training	6	26	318	68	69	30	684	81	1071	179	1250	24

B) Distribution of seeds/ planting materials:

The KVK Bolangir conducted 25 programmes in their district where 481.1 quintals of minikit seeds (paddy, groundnut and greengram) and 9340 planting materials (mango and guava) were distributed among selected 25 villages. A total of 7460 farmers of different categories were directly benefitted from various input distribution. About 25 officials from various departments of the district also attended the programmes.

C) Livestock related activities:

A total of 25 programmes on livestock activities including artificial insemination and vaccination of bovines, caprines and ovines were conducted. The total number of vaccination was 10985 and the number of benefitted farmers were 4769. Fifty two officers were present in those programmes.

D) Distribution of soil health cards:

The soil samples from farmers' field of 25 villages of Bolangir district were collected with the help of Department of Agriculture, Bolangir and were analyzed by KVK Bolangir. The soil health cards (SHC) were issued to the farmers during the programme in the presence of a large number of state level officers. The aim of distribution of SHC was to know the status of existing soil so that unnecessary expenditure on fertilizer application was avoided. A total of 3293 farmers were directly benefitted from that.

			N	o. of fe	No. of other officials						
Activities	SC		ST		Others		Total			(except KVK) attended the

Soil health card distribution	340	25	150	28	2450	300	2940	353	3293	25	

E) Establishment of NADEP pits:

The NADEP method of making compost was first invented by a farmer-Sh. Narayan Deotao Pandharipande (popularly known as "Nadepkaka") from Maharashtra. It can be done in the area with limited moisture condition. The NADEP method needs a permanently built tank of mud or clay bricks, or cement blockettes to compost. During Krishi Kalyan Abhiyan programme, it was decided that out of 25 selected villages, 15 villages would be covered

by KVKs and remaining 10 would be covered by State Agriculture Department. There was a provision to establish 20 NADEP pits in each village of 25 Aspirational districts. For the KVKs, fund for NADEP pit (@7000/- per pit) was routed through ICAR and for State Agricultural Department, it was routed through RKVY. A total of 300 NADEP pits were constructed by Bolangir KVK and 300 farmers including 90 from SC, 45 from ST and 165 from other categories were benefitted from the programme.

Activities			No. of other

	M	F	M	F	M	F	М	F	T	programme
NADEP pit establishment	80	10	38	7	143	22	261	39	300	7

F) Distribution of farm implements:

The agricultural farm implements were distributed among farmers to reduce cost of cultivation and drudgery. The farmers were also demonstrated through organizing programmes for the use of various implements. Nineteen officials were present in such type of programmes. About 46 farmers got benefit from various farm implements distribution in the district.

B) Distribution of seeds/planting materials:

The KVK Dhenkanal conducted 25 programmes in their district where 248.1 quintals of minikit seeds (paddy, groundnut and greengram) and about 32000 planting materials (mango, guava) were distributed among selected 25 villages. A total of 8754 farmers of different categories were directly benefitted from various input distribution. About 53 officials from various departments of the district attended the programmes.

C) Livestock and fishery related activities:

Twenty five programmes on various livestock activities were conducted. A total of 13380 animals including bovines, caprines and ovines were vaccinated and about 850 numbers of animals, birds, fish fingerlings etc. were distributed among the farmers of the district under the programme. The total number of benefitted farmers were noted to be 6688. Fifty two officers from other departments were present in those programmes.

D) Distribution of soil health cards:

A total of 3900 farmers were provided with soil health cards in the presence of 21 various officials of the district in different programmes conducted by the KVK Dhenkanal.

Chapter 2: Krishi Kalyan Abhiyan-II

Considering its overwhelming response, the second phase of Krishi Kalyan Abhiyan was launched by the Ministry of Agriculture and Farmers Welfare from 2nd October, 2018 to 25th December, 2018 in 117 Aspirational districts. The main focus of the programme was to give a boost to agriculture and allied activities in those aspirational districts. An Action Plan comprising of various agricultural related activities of the three departments viz., DAC&FW, DAHD&F and DARE was implemented during this period with Krishi Vigyan Kendras as the nodal point. The following activities were undertaken during KKA-II:

- Distribution of soil health cards to the farmers.
- Distribution of free mini kits of pulses and oilseeds
- ◆ Foot and Mouth Disease (FMD) vaccination for bovines
- Peste des petits Ruminants (PPR) vaccination for sheep and goats
- Artificial insemination
- ◆ Distribution of agricultural implements
- ◆ Training programmes in each of the villages on the following aspects-
 - ▲ Bee Keeping
 - ▲ Mushroom cultivation
 - ▲ Kitchen garden (preferably of women)
 - ▲ Other relevant income generating activities
- Distribution of planting materials

E) Establishment of NADEP pits:

During KKA-II, KVK Gajapati helped farmers to establish NADEP pits for composting various animal and agricultural wastes/ byproducts into decayed nutrient rich organic matter, called humus. It helped farmers in improving soil quality and in promoting organic farming. Fifty farmers got direct benefit from establishing their pits. The fund was distributed to the selected farmers through organizing programmes where many officials from other departments were present.

Chapter 3: Krishi Kalyan Abhiyan-III

The 'Rastriya Gokul Mission' was launched during December, 2014 for developing and conserving indigenous breeds through selective breeding especially for genetic upgradation of more than 11 crore low milk non-descript bovine population. The progress of artificial insemination (AI) coverage of indigenous bovines was very slow. By that time, Krishi Kalyan Abhiyan I and II programmes were successfully implemented. Considering the success, Department of Animal Husbandry, Dairying and Fisheries, GoI in collaboration with Indian Council of Agricultural Research (ICAR) decided to extend the implementation of genetic upgradation programme through High Yielding Indigenous Breed (HY-IB) bovine semen and delivery of quality AI services in 8971 Indian villages among 112 aspirational districts from 15.01.2019 to 15.04.2019. It was decided that the number of AI which was scheduled for one year would be covered in 2-3 months. The following objectives were met out with the extended Krishi Kalyan Abhiyan programme-

- → Providing doorstep reliable AI delivery system in aspirational districts
- ♦ Adoption of AI technology by large number of farmers
- ♦ Birth of genetically superior male and females of indigenous breeds
- → Increase in milk production
- → Increase in farmers income

State Livestock Development Boards, State Animal Husbandry Departments, State Milk Federations and Reputed NGOs like BAIF and SK Trust were the main implementing agencies in the programme. At state level, the scheme was monitored by State Animal Husbandry Department and other players engaged in cattle and buffalo development. At district level, District Animal Husbandry Officer (DAHO) was given the responsibility to send daily AI report to the Senior Scientist and Head of KVKs for uploading in KVK Portal. Under ICAR-ATARI Kolkata, out of total 112 aspirational districts of India, 10 districts from Odisha state were covered under that programme. The brief achievements in terms of AI done for different Aspirational Districts are given below.

Sl. No.	Name of district	No. of villages covered	No. of AI done
1	Bolangir	75	91
2	Dhenkanal	75	858
3	Gajapati	75	198
4	Kalahandi	75	2390
5	Kandhamal	75	816
6	Koraput	75	2073
7	Malkangiri	75	197

Chapter 4: Learning experience

The Krishi Kalyan Abhiyan programmes, comprised of a number of comprehensive activities, were conducted by various departments of the Ministry viz. Department of Agriculture, Cooperation & Farmers Welfare (DAC&FW), Animal Husbandry Dairying & Fisheries (DAHD&F) and Department of Agricultural Research & Education (DARE-ICAR) with Krishi Vigyan Kendras as the nodal point for giving a boost to agriculture and allied activities in 112 Aspirational Districts. It was organized in three phases. The first phase started from 1st June, 2018 to 31st July, 2018 which was later extended up-to 15th August, 2018 whereas the second phase was from 2nd October, 2018 to 25th December, 2018 and the third phase from 15th January, 2019 to 15th April, 2019. The programmes during the Abhiyan were conducted in 25 Villages with more than 1000 population each in Aspirational Districts identified in consultation with Ministry of Rural Development as per directions of NITI Aayog. In districts where number of villages (with more than 1000 population) is less than 25, all villages were covered. The overall coordination and implementation in the 25 villages of a district was done by KVK of that district. The daily activities of KVKs and other state Departments relating to Agriculture and Animal Husbandry were uploaded by the concerned Aspirational District KVKs in KVK Portal for proper monitoring from different levels. All 10 Aspirational District KVKs under ICAR-ATARI Kolkata and other departments of the concerned district worked relentlessly to achieve their targets. The eagerness of farmers towards adoption of new technologies to increase agricultural production was remarkable. In organizing capacity building training programmes, the performance of all KVKs under ICAR-ATARI Kolkata was outstanding. But, some of the targets could not be fulfilled, which resulted in poor ranking on overall performance at national level. However, the Abhiyan had a mixture of some sweet and sour memories which are shared as below. The sweet memory always gives us inspiration whereas from bitter experiences, we should learn or take lesson. Therefore, those loopholes must be properly addressed while conducting such types of mega events in future.

Benefits of the programmes:

- ◆ Capacity building trainings on mushroom cultivation, beekeeping, kitchen gardening and other need based trainings in Aspirational District villages helped the farmers in realizing their potential needs and motivated self help group (SHG) members for income generation.
- ★ Educating farmers for AI with superior germplasm, vaccination against common livestock diseases, soil test based fertilizer application, distributing agricultural and horticultural critical inputs and promoting organic farming through establishing NADEP compost pits etc. indicated the role and responsibility of Government towards the betterment of farming community.

- ◆ Large scale demonstrations, showcasing improved varieties/ strains and latest technological innovations available for the farmers created tremendous impact in agricultural production in the district/ state.
- ◆ Collaborative work culture with all other departments and focus on the same 25 selected villages had created a massive change in the mindset of the farming community in our country. A systemic, holistic and integrated approach in executing programmes through convergence mode by involving all stakeholders definitely helped the farmers to take agriculture to a new height.
- ◆ Awareness was created among agricultural farmers for increasing profitability through adopting/ selecting no or minimum land based enterprises.
- ♦ More numbers of remote villages were covered under the Abhiyan.
- ★ There was a trend to increase yields and areas of various agricultural commodities in the districts after conducting the programmes.

Problems faced during implementation of programmes:

- ◆ Considering the resource persons and manpower availability, KVK personnel should have been assigned to impart only capacity building training programmes in the selected villages. Sometimes, it was very difficult for the KVKs to achieve other scheduled mandated activities. There might have been the provision for appointing additional manpower in the form of either Senior Research Fellow or Data Entry Operator or Young Professional or the likes for those types of specialized programme.
- ◆ Dedicated action plan workshop for implementing agencies should have been organized at the beginning and end of the programme.
- → The KVKs should have been given the responsibility to select villages where the activities were to be conducted. Villages were too scattered to carry out the programmes in short period. It was a great challenge.
- ◆ Sufficient time should have been given to the KVKs and other line departments of the district for preparedness and implementing programmes/ conducting activities. Nodal agency/ implementing agency should have been well equipped before starting the Abhiyan.
- ◆ At the initial stage, there was communication gap among the ground level implementing authorities/ personnel. In some places, convergence/ coordination/ support from other concerned departments in the district was very poor. The implementing authorities/ agencies might have been sensitized first about the

objectives and *modus operandi* of the programmes.

- → The basic infrastructure particularly on micro-irrigation (MI) and integrated farming systems (IFS) should have been established/strengthened at the KVKs well in advance before starting demonstration programmes.
- ★ The number of NADEP pits established per village was less. In most of the cases, the selection of only 20 farmers out of the whole village was very difficult for the KVKs. Again, the size of the recommended pit was too small.
- ♦ While supplying seed/ planting materials to the farmers, season/ appropriate variety/ need of farmers/ need of villages etc. might have been considered.
- ◆ Inadequate storage spaces/ structures for keeping various inputs supplied during the programmes, also posed a challenge.
- ★ There was no provision of fund allotted to the KVKs for transporting mini-kits and planting materials.
- → It was very difficult for KVKs to cover all the targeted activities in all villages within limited time span.
- ◆ Being the remote villages, internet facilities were very poor. At that juncture, it was a herculean task for the KVKs in receiving all kinds of data from other departments in time for uploading in KVK portal.
- ★ The fund allocated for training should have been more.
- ◆ Provision of exposure visit for the farmers should have been included in the programmes.
- ◆ Certain focused programmes relating to Livestock and Fishery might have been included under the Abhiyan.
